TED FULLERTON

Ted Fullerton works in contemporary painting, printmaking and sculpture, and has achieved numerous awards for his work. Fullerton graduated from the Ontario College of Art in 1976. In 1993 and 1994, he was artist-in-residence at Cape Dorset and at Canadore College in North Bay. Fullerton's painted works on canvas and panel demonstrate an energetic painting style marked by textural surfaces and high colour contrasts. Sculptural work—made up of wood and bronze elements, often in the same composition—show both evidence of the artist's hand and rustic, weathered surfaces that contribute to these works' archival and archetypal themes.
